

Four reasons to upgrade OnBase

You can be confident knowing you've invested in a platform that's continually improved. With key updates and enhancements in each release, OnBase continuously adapts to your environment while also equipping users with more of the tools they need to truly revolutionize the way they work. Here are four reasons to upgrade to the latest version of OnBase.

Connect to the Content Innovation Cloud

By upgrading your OnBase platform, you will be positioned to seamlessly connect to the Content Innovation Cloud and AI-enable your environment. You will benefit from:

- Content Intelligence - Transform your unstructured data into AI-enabled insights, unlocking its potential to drive efficiency, innovation, and faster decision-making
- Process Intelligence - Harness intelligence to automate and orchestrate workflows, eliminating bottlenecks, improving efficiency, and accelerating business operations
- Application Intelligence - Embed AI-driven intelligence into business applications like Salesforce, Workday, and more—so teams get the insights and information they need, when they need it

New and improved functionality

Take advantage of the latest OnBase enhancements to empower your knowledge workers with better information access and modern experiences to deliver exceptional service to your customers.

- Benefit from the most up-to-date user experiences across a range of clients, devices and integrations
- Get access to the latest configuration tools to simplify administration and speed innovation

Bolstered security and faster performance

Hyland has a team dedicated to evaluating the security of OnBase continually tests and evaluates the platform against the latest threats. Every release cycle also includes testing to ensure optimal performance as well as updates and software changes to address both.

- Ensure your system remains stable and secure with the latest security updates, equipping you to meet current compliance standards and reducing risk
- Keep your users productive with optimally performing software

Updated compatibility

Each OnBase release includes support for the latest browsers, operating systems and new and expanded integrations with common business applications. This equips your organization to stay up-to-date with the latest technology advancements.

- Maintain support for the latest evergreen browsers and operating systems
- Ensure compatibility with the latest versions of third party applications and integrations

▶▶ The future

With each release, we're making OnBase more powerful, more configurable, and more connected to your environment. All upgrades, including OnBase monthly service releases, are included with your annual maintenance.

By connecting OnBase to the Content Innovation Cloud you will benefit from features to make your upgrades faster and easier than ever before. Maximize the value of your OnBase investment by upgrading to the latest version today.
